

SHE SUFFERED FIVE YEARS

Finally Cured by Lydia E. Pinkham's Vegetable Compound.

Erie, Pa.—"I suffered for five years from female troubles and at last was almost helpless. I went to three doctors and they did me no good, so my sister advised me to try Lydia E. Pinkham's Vegetable Compound, and when I had taken only two bottles I could see a big change, so I took six bottles and I am now strong and well again. I don't know how to express my thanks for the good it has done me and I hope all suffering women will give Lydia E. Pinkham's Vegetable Compound a trial. It was worth its weight in gold. Mrs. J. P. EDWARDS, R. F. D. No. 7, Erie, Pa.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and to-day holds the record for the largest number of actual cures of female diseases we know of, and thousands of voluntary testimonials are on file in the Pinkham laboratory at Lynn, Mass., from women who have been cured from almost every form of female complaints, such as inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, indigestion and nervous prostration. Every suffering woman owes it to herself to give Lydia E. Pinkham's Vegetable Compound a trial.

If you want special advice write Mrs. Pinkham, Lynn, Mass., for it. It is free and always helpful.

Petite Eye Salve

QUICK RELIEF FOR SORE EYES

In Sunday School.

"What can you say of Cain?"

"He was the first boy scout."

Mrs. Winslow's Soothing Syrup for Children.

Teething, softens the gums, reduces inflammation, allays pain, cures wind colic, etc. a bottle.

Definition of Velocity.

Teacher—"What is velocity, Johnny?"

Johnny—"Velocity is what a Johnny gets go of a wasp with."

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels.

Sugar-coated, tiny granules. Easy to take as candy.

The time a man begins to fear for the future of his country is when he fears he is going to lose a job in the election.

CHRISTMAS POST CARDS FREE

Send 5 stamps for five samples of our very choice of Christmas Post Cards. Every bottle guaranteed. Over 750,000 bottles sold last year. \$2.50 and \$1.00. Good good gifts, or send to manufacturers. Agents wanted. Write for free book. Spohn Med. Co., Spec. Contagious Diseases, Goshen, Ind.

After a man has been married about a year he begins to wonder why his friends didn't get busy and have him locked up before he did it.

Blood Poisoning is often caused by slight cuts or wounds. Death may result. Hamlin's Wizard Oil will draw out the poison, heal the wound and prevent serious trouble.

Right Place.

"Henry may be a bad student, but at least he is consistent."

"In what way?"

"I caught him swearing over his profane history."

Distemper

In all its forms among all ages of horses and dogs, and others in the same stable prevented from having the disease with Spohn's Distemper Cure. Every bottle guaranteed. Over 750,000 bottles sold last year. \$2.50 and \$1.00. Good good gifts, or send to manufacturers. Agents wanted. Write for free book. Spohn Med. Co., Spec. Contagious Diseases, Goshen, Ind.

Elemental Error.

Judge Stevens was angling in the Mantiowish waters, and just after dinner became involved in an argument with his boat companion. The debate lasted some minutes, and during that time the judge had his baited hook dangling in the air over his shoulder.

The guide took a hand.

"Judge," said he, peremptorily, "drop your line in the water. There are no flying fish around here."—Chicago Post.

Urgent Necessity.

A distinguished theologian was invited to make an address before a Sunday school. The divine spoke for over an hour and his remarks were of too deep a character for the average juvenile mind to comprehend. At the conclusion, the superintendent, according to custom, requested some one in the school to name an appropriate hymn to sing.

"Sing Hymn No. 521," shouted a boy in the rear of the room.—Life.

Arms Made to Order.

A United States senator, worth millions which he made rapidly, has a coat-of-arms recently acquired. He gave a large dinner party one night. His coat of arms was emblazoned in gold on the top of the dinner cards. The lady who went in with the senator, the wife of another senator, observed the insignia when she picked up her dinner card and exclaimed: "How pretty!"

"Yes," replied the senator proudly, "I think it is rather neat. My wife invented it."—Saturday Evening Post.

NOTES FROM MEADOWBROOK FARM

By William Pitt

Late in the fall is a good time to hatch spring chicks in some sections.

Shorts are more economical feed for sows and growing pigs than corn.

The deepest mudhole and steepest hill measure the real distance to market.

Turkeys will soon become weak and subject to disease where inbreeding is practiced.

Drenching is a poor way to give doses of liquid medicine to any farm animal.

Where there is plenty of skimmed milk, beef scraps for hens need not be bought.

When the hogs fail to gain at least a pound a day it is time to say good-bye to them.

Get your cows started right for the coming cold weather and they will do well all winter.

Build a warm, dry and otherwise comfortable room for the calves for the cold weather.

When selecting a cow for the dairy look and see if the eye of the animal is large and full.

This is the time of the year when dairy cattle require better care and more liberal feeding.

A mule is no more prone to kick than a horse unless he is taught to do so by bad treatment.

Always have a great deal of respect for the bull. His past conduct is no guarantee of future gentleness.

When fattening for the market, do it quickly; push all the feed down the hogs they will stand for.

To thoroughly clean milk utensils they first should be rinsed with cold water, to remove all particles of milk.

The successful feeding of lambs depends largely on their being offered great variety of food while in the yards.

It is now a well known fact that the average pure-bred will produce more milk than the average grade cow.

Peach trees can be planted any time between last and first frost; the earlier in the winter they are planted the better.

Keep all the rotten fruit well cleaned up around the orchard, as these constitute the winter quarters of numerous orchard pests.

If all of the garden space is to grow profitable crops, no large trees must stand closer than thirty to fifty feet from the garden fence.

The calf that is expected to develop into a strong and profitable cow should be given all the chance possible during its early period of growth.

The best results are usually obtained from the work that is systematized and most carefully planned. This is not always the hardest work on the farm.

The best way to stop a hog from eating chickens is to put it on the market as soon as possible, since it will soon lead other hogs into the bad habit.

The best milking pail is the one so constructed that it will reduce to a minimum the amount of dirt falling into the milk during the process of milking.

An old horseman says that the chief cause of colic in horses, or the cause of the largest per cent. of these cases, is brought through long abstinence from water.

Do not neglect to secure a good supply of fine dust for the fowls during the coming winter, while the ground is yet dry and there is dust in the road.

There is much difference in the individuality of cows and their powers to produce milk as there is in men and their powers to perform certain kinds of work.

The profit in a cow comes from the extra amount of milk she will yield over what she ordinarily gives on common pasture or the coarse feeds usually given her.

The poultry raiser who notes his flock carefully, taking into account what they are doing, and capable of doing, ought to know more how to feed and what to feed, than anyone advising at long range.

Poultry experts claim that the ordinary hen averages only eighty eggs per year, whereas she ought to lay at least one hundred and fifty. That is, she ought to lay twice as many eggs as she does now. The aim of the fancy poultry man has always been to increase egg production and he is succeeding to a great extent, for the two-hundred-egg a year hen is now no longer a rarity.

Winter is coming, batten the cracks.

Sour milk is caused by dirt and warmth.

What water is to a person, a dust bath is to a hen.

See that your fowls are absolutely free from vermin.

If the feathers are to be sold, ducks must be dry picked.

There is profit in breeding turkeys up to the fifth year.

The value of butter increases as the quality improves.

A good horseman never trots a draft horse, even when he has no load.

Laying hens need from 15 to 25 per cent meat scraps added daily to their mash.

Don't feed hay or other forage, which will raise a dust, before or during milking.

Tainted, musty or mouldy feeds should never be served in the dairy herd stables.

If we have no access to road dust, we may take some field earth, fine and free from lumps.

The best market for skim milk on the farm is afforded by good dairy calves and quick growing pigs.

If the cream in the churn foams up and runs over, the churn is too full or the cream is improperly ripened.

Simply because a calf is given her ration of milk each day, it does not signify that she does not need water also.

Cholera and other diseases of swine attack herds which are in poor condition and consequently most susceptible.

If your horse is troubled with indigestion have the animal clipped and its teeth attended to by a veterinarian.

Until recent years the poultry business, especially on the farms, was of so little importance that not much attention was paid to it.

The egg production of the United States is given as \$400,000,000 for the past year. The entire poultry production is put at \$600,000,000.

Prune out old canes of raspberries and blackberries and burn them. Thin the hills to three or four shoots. Cultivate, and add some manure to the soil.

The red mites or lice do not stay on the fowls during the daytime, but hide in cracks during the day, rallying forth after dark to seek their prey.

Orchardists who have never used dynamite should be sure to get all possible information from the manufacturers of the explosive before attempting to use it.

If celery is to be brought into the cellar for winter storage cut the top root, lift it from the ground and then with a strong knife cut off the branching roots and most of the earth.

Lousy fowls are necessarily weaker than fowls that are free from lice, and strength and vitality are quite important factors while the fowls are producing their new suit of clothes.

If your fowls have the range of the fields and orchards and can pick up a number of insects and worms daily, you will not need to bother much about the meat supply in the ratpox.

Although flying about and apparently of mature age, birds may be distinguished as squabs by the squealing noise they make, which is always the call of the squab.

The raising of poultry on the farm or in conjunction with fruit growing, can be made very profitable with the same kind of management that is devoted to raising good stock or good grain.

Everything should be kept as clean on the little chicks' feeding floors as if it is on the floor of the kitchen. If this is done the little birds will never have gaps or many of the chicken diseases.

If you are feeding clover, remember to cut down the bulk. This is a hearty food and you can't use as much of it as you can of timothy without doing your horse harm.

In filling a silo attention must be given to the outer edges, for when the silage begins to settle there is always a draw away from the wall, leaving an air space that makes the silage spoil.

There is no better germ slayer than an ounce of carbolic acid added to a pail of whitewash. Give the walls and ceiling of the hen house a good coating, working it in rather thick in all cracks and crevices.

There is not a farm in the country where farming is seriously attempted at all where it is necessary to try to raise chickens without decent provision for the safety of the flock and for the convenience of the attendant.

Have a gunny sack soaked with crude oil hanging over the hole made for the pigs in the farrowing pen to run through, just high enough to rub their backs as they run through. This will be sufficient to keep them disinfected from lice, etc.

Power farming is as certain to come as is next Fourth of July. It means a lowered cost of production, and an increased profit. It makes possible the large farm well-titled, and substitutes expensive horsepower for reliable and

GOLDS BREED CATARRH

Her Terrible Experience Shows How Peruna Should Be in Every Home to Prevent Colds.

Mrs. C. S. Sager, 131 Woodland Ave., Kansas City, Mo., writes: "I feel it a duty to you and to others that may be afflicted like myself, to speak for Peruna. My trouble first came eight or nine years ago, a gathering in my head and neuralgia. I suffered most all the time. My nose, ears and eyes were badly affected for the last two years. I think from your description of internal catarrh that I must have had that also. I suffered very severely. 'Nothing ever relieved me like Peruna. It keeps me from taking cold. With the exception of some deafness I am feeling perfectly cured. I am forty-six years old. I feel that words are inadequate to express my praise for Peruna.'"

DIET FOR THE TUBERCULOUS

General Idea That Too Much Food Cannot Be Given Is Shown to Be Erroneous.

Many traditions with regard to the feeding of tuberculous patients and with regard to food in general, are given severe blows in a series of articles published in the October number of the Journal of Outdoor Life, the official organ of the National Association for the Study and Prevention of Tuberculosis. Dr. John R. Murlin of New York, assistant professor of physiology at the Cornell university medical college, holds in an article entitled "The Dynamic Principles of Nutrition," that a consumptive will gain weight and do well on three plants of whole milk, eight ounces of cream, five ounces of milk sugar, six eggs and two slices of buttered toast as a ration for 24 hours. The entire diet, with the exception of the bread and butter, could be prepared in advance and served for a cost of about fifty cents for the day. Miss Cecilia Fillet of the Henry Phipps Institute of Philadelphia also offers some sample diets which the ordinary family can prepare for even less than fifty cents a day.

Dr. David R. Lyman of Wallingford, Conn., and Dr. Paul B. Johnson of Washington, D. C., both agree that the ordinary person eats too much, and that the old notions about stuffing a tuberculous patient at all times and seasons have been proven false. Dr. Lyman holds that eggs are not a necessary article of the consumptive's diet, but that a tuberculous patient should eat anything that agrees with him that is nourishing. He thinks that a tuberculous patient should eat only a little more than a person in ordinary good health.

Her Infinite Variety.

A woman smoked a cigarette, and made thereby a sensation.

Such a sensation, in fact, that shortly another woman was smoking, and then another.

But as more and more women smoked the sensation they made grew less and less, until at length they made no sensation at all.

That ended it.

"Well, what next?" quoth woman-kind, for age could not wither her nor custom stale her infinite variety.—Puck.

Natural Ending.

"Our cook's dead."

"Indeed? Did she die a natural death?"

"Yes, the natural death of a person who tries to light a fire with kerosene!"—Stray Stories.

To Be Pleasant In the Morning

Have some Post Toasties

with cream for breakfast.

The rest of the day will take care of itself.

Post Toasties are thin bits of White Indian Corn—cooked and toasted until deliciously crisp and appetizing.

BELSHAZZAR'S FEAST AND FATE

Sunday School Lesson for Nov. 12, 1911

Special Arranged for This Paper

LESSON TEXT—Daniel 5.

MEMORY VERSES—5, 23.

GOLDEN TEXT—"God shall bring every work into judgment, with every secret thing, whether it be good or whether it be evil."—Eccl. 12:14.

TIME—This event described belongs to the last years of the exile, B. C. 539, when Babylon was taken by Cyrus and his generals.

The decree of return, and the first return, occurred a year or two later.

PLACE—Babylon the capital, enlarged, beautified and fortified by Nebuchadnezzar.

Under the great Nebuchadnezzar Babylon rose in grandeur, power and extent, till it became the most magnificent and beautiful city of antiquity. In those days Babylon was the metropolis of the world, the center of commerce, art and wisdom. The wealth of the world poured into its coffers. Babylon was the strongest fortress in all the world. Belshazzar was the acting king of Babylon at the time of this lesson, while his father Nabonidus was the nominal and legal king who lived and warred outside of the city.

Cyrus had been advancing toward Babylon. He gained a decisive victory over Nabonidus, on his way to the capital, and his army entered the city without fighting, and peace was proclaimed. A portion of the city, probably the citadel including the royal palace, held out for some time, being occupied by the army of Belshazzar as a rallying place. Two or three weeks later Cyrus made his triumphal entry into the city. Seven days later, the general of Cyrus stormed that part of Babylon which had held out against his army, and on that night Belshazzar was slain. It was during this week that Belshazzar made a magnificent banquet to encourage his generals and princes in their struggle with the Medo-Persian foe.

At his feast, therefore, Belshazzar sought to remind his warriors of the old campaigns their forefathers had fought. He had in his possession the treasures which these forefathers had carried from Jerusalem when they conquered Israel, and as it seemed to them, Israel's Jehovah. His conduct thus was not merely that of a drunkard, but partly of a cool politician, when amid the applause of a thousand courtiers and army commanders he ordered the sacred vessels of the Temple of Jerusalem to be brought into the hall of feasting. Such a scene would fill the hearts of the wine-inflamed warriors and nobles to overflowing with daring, and also bring a worthy occasion for the divine interference to encourage his people on the eve of their deliverance.

In the midst of the carousal, the king saw the fingers of a man's hand writing strange words, "letters of fate and characters of fear," on the wall in the full blaze of the candlestick, perhaps the great golden candlestick taken from the temple. There is something blood-curdling in the visibility of but a part of the hand and its busy writing. No wonder if the riotous mirth was frozen into awe, and the wine lost flavor.

Belshazzar, in his terror and horror, summoned his wise men to declare what the strange apparition and the blazing letters meant, and promised great rewards to the one who should interpret them; but all failed. Either they could not make sense of the letters, or could not perceive what meaning they had. Even if they had understood, it is not likely that one of them would dare to speak it out before the king.

Then the queen mother, mother of Belshazzar, came in and spoke of Daniel as one who had shown great gifts at interpretation to his grandfather Nebuchadnezzar. It took place before this boy king was born, and he, naturally, knew nothing about the story. Daniel was sent for, and came into the festival hall. He heard the king's offer, and spurning it, spoke brave and true words which might easily cost him his life. He told the story of Nebuchadnezzar's fall from the height of pride, and accused him of dishonoring the true God. Then he interpreted the message written on the palace walls: "Thou art weighed in the balances and found wanting."

The want of religious restraints and motives, exposes one undefended to the powers of temptation. Belshazzar would enrich the splendor of his feast by the sacred goblets and dishes of gold that Nebuchadnezzar had taken from the temple at Jerusalem. They were brought, and made to be instruments for drunken revelry and lust, and worship of idols, thus declaring that the idols had given them the victory over the God of the Jews. He little realized the power of the God whom he was defying, nor the reason why he had permitted the Jews to be disciplined by exile, and the victory of Cyrus over Babylon was one of the means by which the exiles should be able to return home, and carry those very golden vessels back to Jerusalem. The church in the wilderness was like the burning bush that Moses saw; and like the three heroic men in Nebuchadnezzar's fiery furnace, unconsumed because God was with them. The true religion, the principles of the kingdom of heaven, and the laws of God, are certain to triumph at last over intemperance and all its evils.

The social power of the wine cup, its connection with feasting, comradeship, hospitality, good cheer, is one of its most dangerous attractions. And one of the chief defenses against its power lies in showing that good cheer, fellowship, sociability, eating together, may be enjoyed in the highest degree where men "eat and drink and in communion sweet quaff immortality and joy," without the fascination of the wine cup.

Belshazzar lost his city and his kingdom. So still by intemperance are men continually throwing away the kingdom God has prepared for them, the kingdom of manhood, the kingdom of self-control, the kingdom of the world in which we live and of its laws which we can compel to aid us in all that is good.

IN HOSPITAL NINE MONTHS.

Awful Tale of Suffering From Kidney Trouble.

Alfred J. O'Brien, Second St., Sterling, Colo., says: "I was in the Baltimore Marine Hospital nine months. The urine was in a terrible state and some days I passed half a gallon of blood. They wanted to operate on me and I went to St. Joseph's Hospital at Omaha, putting in three months there without any gain. I was pretty well discouraged when advised to use Doan's Kidney Pills. I did so and when I had taken one box, the pain left me. I kept on and a perfect cure was the result."

"When Your Back Is Lame, Remember the Name—DOAN'S." 50c a box at all stores. Foster-Milburn Co., Buffalo, N. Y.

Appetite Not a Necessity.

Dr. John R. Murlin of New York, assistant professor of physiology at the Cornell university medical college, in an article in the October number of the Journal of the Outdoor Life, compares the food we eat
